I find that XM is a god send to my family as my husband is a truck driver. And having the local weather, and traffic reports would help him greatly in areas which he is not normally in. As well as there is programing in which I can not get in the local market which I am in now. As well as music without commercials. Also when you can not get a radio station or programing like that. XM provides it. which is why we as a family have chosen it.

This isn't something that is a free service but I paid for. So I would like to have this remain open as a paid service. Please reject the petition numbered 04-160 as it will take the paid services away that I have now.
